

Danger Timeline

January 2000

Danger founded by former Apple, Philips and WebTV veterans Andy Rubin, Joe Britt and Matt Hershenson

September 2000

Danger secured initial round of funding of approximately \$11 million.

6 September 2000

At the DemoMobile Conference in La Jolla, Calif., Danger unveiled the first device based on the hiptop™ reference design. At the same time, Danger provided an overview of the capabilities it would offer with the hiptop™ wireless solution. The producer of DemoMobile, Jim Forbes, said "...the fundamental differentiator allowing Danger to redefine the category is their back-end service that supports the device. This active state technology allows Danger to break the price barrier and deliver a compelling consumer offering. The service does the heavy computing and continually updates the user with new services and capabilities without the need for expensive new hardware."

July 2001

Danger secured approximately \$18 million in its Series B financing. Leading venture capital firm Redpoint Ventures led the round. Also included were T-Venture, the venture-capital arm of Deutsche Telekom; Orange Ventures, the venture arm of Orange S.A.; InOvate Communications Group; Diamondhead Ventures, and Softbank Venture Capital.

5 December 2001

Technology pioneer and Apple co-founder Steve Wozniak joined Danger's board of directors (Mr. Wozniak continues to serve on the company's Advisory Board).

14 January 2002

Danger's hiptop™ device was selected as a Best of CES (Consumer Electronics Show) Award winner in the PDA, Handheld and Mobile Wireless category and first runner up for Overall Best of Show.

May 2002

Danger secured approximately \$13 million in Series C financing.

6 August 2002

Danger announced that T-Mobile plans to offer the hiptop™ wireless service and mobile device to its consumer customers in the United States. The mobile device, based on the hiptop™ design, will be called the T-Mobile Sidekick. Danger also announced multiple key relationships:

- Danger announced manufacturing relationships with Benchmark Electronics and Flextronics, for the production of hiptop™ wireless devices.
- Danger announced a technology relationship with Intel, which supplies Danger with radio technology for the hiptop™ wireless device.

- Danger announced a technology relationship with Beatnik, which provides Danger with an audio engine.
- Danger announced that it is working with Kyocera, which supplies Danger with a small digital camera used with the hiptop™ wireless device.
- Danger announced that it is working with TTPCom, which is the provider of the GSM/GPRS protocol stack used with the hiptop™ device.
- Danger announced the first third-party applications for the hiptop™ communicator – games from UIEvolution and nGame; community-building software from Upoc; interactive agents for instant messaging from Active-Buddy; synchronization software from Pumatech; and secure access to enterprise data from SEVEN.
